Ensuring that teckentrup SLI products purchased through distributors meet the specifications

Dear Sir or Madam,

In light of recent events, we would like to draw your attention to an important aspect of procuring our screw locking elements through distributors.

To ensure that the teckentrup SLI quality that meets specifications is actually used when procuring through distributors, we ask that you take the following points into account when placing orders in the future.

Unfortunately, simply specifying an item or manufacturer designation—such as “NSK locking washer” or “teckentrup contact washer”—in order texts is not sufficient. In such cases, substitution with products of differing quality cannot be ruled out.

To avoid this, we recommend clearly specifying the desired teckentrup SLI screw locking element in the design, bill of materials, and order text. It has proven effective to include the item description, material, part number, and manufacturer.

Example:

- NSK-M 8, Mat.: A4, Item No. 076040, Manufacturer: teckentrup SLI
- NSK-M 8, Material: C60 with zinc flake, Part No. 070040, Manufacturer: teckentrup SLI

In addition, we recommend ensuring the delivery of genuine NSK washers from teckentrup SLI either through a corresponding supplier agreement or, alternatively, by including a specific order note that clearly identifies the manufacturer.

Only through these measures can we guarantee that the high-quality characteristics of our products are fully preserved and reliably implemented in your application.

We are, of course, always available to answer any questions or provide assistance. Thank you very much for your trust and support.
